Philippine Edition by

**Early Sol A. Gadong and Raphael V. Belleza**

# Contents

## UNIT I

## 2 Realm of Physics

### CHAPTER 1

#### Physical Quantities, Units, and Measurements, 3

##### Lesson 1

#### Conversion of Units and Scientific Notation, 3

- SI Units: Fundamental and Derived Units
- Units of Time, Length, and Mass The Second, Meter, and kilogram
- Scientific Notation
- The Quest for Microscopic Standards for Basic Units
- Unit Conversion and Dimensional Analysis
- Nonstandard Units

**Vector and Scalar Quantities**  
p. 21

##### Lesson 2

#### Accuracy vs. Precision, 12

- Accuracy and Precision of a Measurement

##### Lesson 3

#### Sources and Types of Error, 14

##### Lesson 4

#### Estimating Errors and Uncertainty, 15

- Percent Uncertainty, 5
- Uncertainties in Calculations
- Precision of Measuring Tools and Scientific Figures
- Zeros

### CHAPTER SUMMARY, 18

- Problems and Exercises

### CHAPTER 2

#### Vector, 20

##### Lesson 1

#### Vector vs. Scalar, 21

- Coordinate Systems for One-Dimensional Motion

##### Lesson 2

#### Addition of Vectors, 23

- Vectors
- Vector Addition Head-to-Tail-Method

##### Lesson 3

#### Components of Vectors, 28

- Resolving a Vector into Components
- Resolving a Vector into Perpendicular Components

- Calculating a Resultant Vector
- Adding Vectors Using Analytical Methods

## CHAPTER SUMMARY, 34

- Problems and Exercises

## CHAPTER 3

### Kinematics

#### Motion Along a Straight Line, 36

##### Lesson 1

##### Kinematic Quantities Position, 37

- Time
- Distance vs. Displacement
- Speed vs. Velocity

##### Lesson 2

##### Average and Instantaneous Acceleration, 41

- Average Acceleration
- Acceleration as a Vector
- Deceleration vs. Negative Acceleration
- Instantaneous Acceleration

##### Lesson 3

##### Uniformly Accelerated Linear Motion, 44

- Notation  $t$ ,  $x$ ,  $v$ ,  $a$
- Solving for Final Velocity
- Putting Equations Together

##### Lesson 4

##### Free-fall Motion, 50

- Gravity
- One-Dimensional Motion Involving Gravity

##### Lesson 5

##### One-Dimensional Uniform Acceleration Problems, 52

- Unreasonable Results
- Sign and Direction

## CHAPTER SUMMARY, 61

- Problems and Exercises

## CHAPTER 4

### Kinematics Motion in 2-Dimensions and 3-Dimensions, 64

##### Lesson 1

##### Kinetic Quantities in 2-Dimensions and 3-Dimensions, 65

- Two-Dimensional Motion Walking in a City
- The Independence of Perpendicular Motions
- The Independence of Motion

##### Lesson 2

##### Projectile Motion, 68

##### Lesson 3

##### Circular Motion, 73

- Rotation Angle and Angular Velocity
- Rotation Angle
- Angular Velocity
- Centripetal Acceleration
- Centripetal Force

##### Lesson 4

##### Relative Motion, 83

## CHAPTER SUMMARY, 88

- Problems and Exercises

## CHAPTER 5

### Newton's Laws of Motion and Applications, 90

##### Lesson 1

##### Definition of Concepts, 91

- Real Forces and Inertial Frames of Reference
- Mass vs. Weight
- Free Body Diagrams

**N700 Bullet Train**  
p. 41

## Lesson 2

**Newton's Laws of Motion, 93**

- Development of Force Concept
- Newton's First Law of Motion  
Inertia
- Newton's First Law of Motion
- Newton's Second Law of Motion  
Concept of a System
- Newton's Second Law of Motion
- Unit Force
- Weight and the Gravitational  
Force
- Newton's Third Law of Motion

## Lesson 3

**Contact and Noncontact Forces, 100**

- Contact Forces
- Tension
- Static and Kinetic Friction
- Friction
- Kinetic Friction
- Magnitude of Static Friction
- Magnitude of Kinetic Friction
- Action-Reaction Pairs

## Lesson 4

**Application of Newton's Laws to Single-body and Multibody Dynamics, 109**

- Applying Newton's Second Law
- CHAPTER SUMMARY, 114
- Problems and Exercises

**UNIT II****118 Magnetism**

## CHAPTER 6

**Work, Energy, and Energy Conservation, 119**

## Lesson 1

**Dot Product, 120**

## Lesson 2

**Work Done by a Force, 121**

- What Is Work?
- Calculating Work

## Lesson 3

**Work-Energy Relation, 124**

- Work Transfers Energy
- Net Work and the Work-Energy Theorem
- The Work-Energy Theorem

## Lesson 4

**Kinetic Energy, 129**

## Lesson 5

**Power, 130**

## Lesson 6

**Conservative and Nonconservative Forces, 134**

- Gravitational Potential Energy Work Done Against Gravity
- Potential Energy of a Spring
- Conservation of Energy
- How Nonconservative Forces Affect Mechanical Energy
- How the Work-Energy Theorem Applies

## Lesson 7

**Energy Conservation, Work, and Power Problems, 140****CHAPTER SUMMARY, 144**

- Problems and Exercises

**CHAPTER 7****Center of Mass, Momentum, Impulse, and Collisions, 148**

## Lesson 1

**Center of Mass, 149**

## Lesson 2

**Momentum-Impulse Relation, 151**

- Momentum and Newton's Second Law
- Force and Momentum
- Impulse
- Impulse Change in Momentum

## Lesson 3

**Law of Conservation of Momentum, 155**

- Conservation of Momentum Principle
- Isolated System

## Lesson 4

**Collisions, 158**

- Elastic Collisions in One Dimension
- Elastic Collision
- Internal Kinetic Energy
- Inelastic Collision in One Dimension
- Inelastic Collision
- Perfectly Inelastic Collision

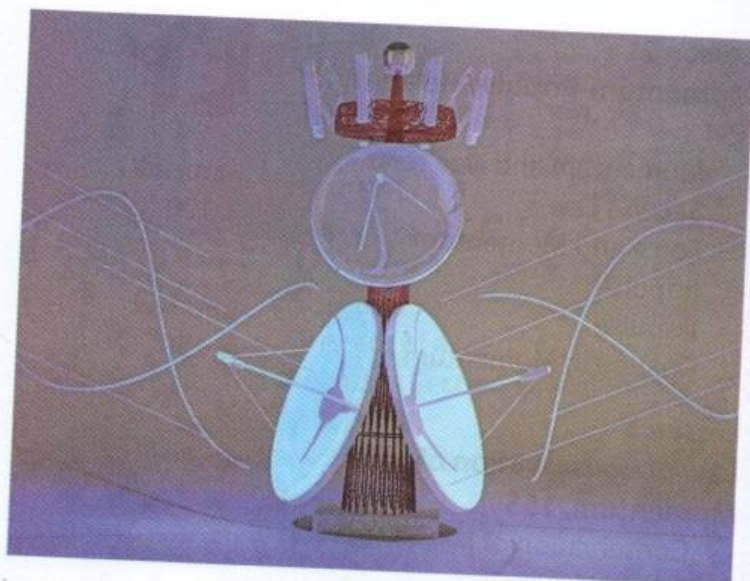

## Lesson 5

**Center of Mass, Impulse, Momentum, and Collision Problems, 162****CHAPTER SUMMARY, 168**

- Problems and Exercises

**Saturn V**  
p. 130**Bird Toy**  
p. 150

### UNIT III

## 170 Waves and Optics

### CHAPTER 8 Rotational Equilibrium and Rotational Dynamics, 171

#### Lesson 1 Rotational Inertia/Moment of Inertia, 172

#### Lesson 2 Translational and Rotational Motion Compared, 174

#### Lesson 3 Torque, 179

- Definition of torque as a cross product

#### Lesson 4 Static Equilibrium and Problems Involved, 182

#### Lesson 5 Rotational Quantities and Rotational Kinematics under Constant Acceleration, 188

- Problem-Solving Strategy for Rotational Kinematics

#### Lesson 6 Rotational Kinetic Energy, 193

- Problem-Solving Strategy for Rotational Energy

#### Lesson 7 Angular Momentum, 197

#### Lesson 8 Torque and Angular Momentum, 199

#### Lesson 9 Conservation of Angular Momentum, 201

#### Lesson 10 Problem Solving Rotational Motion, 204

### CHAPTER SUMMARY, 208

- Problems and Exercises

### CHAPTER 9 Gravity, 210

#### Lesson 1 Isaac Newton's Law of Universal Gravitation and Its Applications, 211

- Gravitational Force, Weight, and Acceleration Due to Gravity
- Tides
- Weightlessness and Microgravity

**Unicycling**  
p. 171

**Microgravity**  
p. 216

**Lesson 2**  
**Gravitational Field and Its**  
**Physical Significance, 217**

**Lesson 3**  
**Gravitational Potential Energy,**  
**218**

- Using Potential Energy to Simplify Calculations
- Escape Speed

**Lesson 4**  
**Planetary and Satellite Motion,**  
**221**

**Lesson 5**  
**Johannes Kepler's Three Laws**  
**of Planetary Motion and their**  
**Applications, 222**

- First Law  
Law of Elliptical Orbit
- Second Law  
Law of Equal Areas
- Third Law  
Law of Harmony

**Lesson 6**  
**Problem-Solving: Gravity, 224**

**CHAPTER SUMMARY, 226**  
 • Problems and Exercises

**CHAPTER 10**  
**Periodic Motion, 228**

**Lesson 1**  
**Quantities in Oscillating Systems,**  
**229**

**Lesson 2**  
**Conditions for Simple Harmonic**  
**Motion, 231**

- Period of Simple Harmonic Oscillator

- The Link Between Simple Harmonic Motion and Waves
- The Simple Pendulum

**Lesson 3**  
**Describing the Damping in an**  
**oscillating System, 237**

**Lesson 4**  
**Conditions for Resonance, 241**

**Lesson 5**  
**Types of Waves, 243**

- Transverse and Longitudinal Waves

**Lesson 6**  
**Characteristic of a Sinusoidal**  
**Wave, 247**

**Lesson 7**  
**Intensity and Power Transmitted**  
**by Waves, 249**

**CHAPTER SUMMARY, 253**  
 • Problems and Exercises

**CHAPTER 11**  
**Mechanical Waves and Sounds,**  
**256**

**Lesson 1**  
**Superposition of Waves, 257**

**Lesson 2**  
**Conditions for Standing Waves,**  
**259**

**Lesson 3**  
**Doppler Effect Relating the**  
**Frequency**  
**and Wavelength with the Motion**  
**of Source and Listener, 261**

- The Doppler Effect

**Non-ionizing**  
**and Ionizing**  
**Electromagnetic**  
**Waves**  
 p. 245

**Brumandino**  
**Dam**  
 p. 280

**Thermal imaging**  
**Camera**  
 p. 307

**Thermal**  
**Expansion**  
 p. 310

**CHAPTER SUMMARY, 270**

- Problems and Exercises

**CHAPTER 12****Fluid Mechanics, 272****Lesson 1****Density and Specific Gravity, 273****Lesson 2****Pressure, 277****Lesson 3****Pressure vs. Depth Relation, 279****Lesson 4****Pascal's Principle, 282**

- Application of Pascal's Principle
- Relationship Between Forces in a Hydraulic System
- Conservation of Energy

**Lesson 5****Buoyancy and Archimedes's Principle, 285**

- Buoyant Force
- Archimedes's Principle
- Floating and Sinking

**Lesson 6****Continuity Equation, 291**

- Flow Rate and Its Relation to Velocity

**Lesson 7****Bernoulli's Principle, 294**

- Bernoulli's Equation
- Conservation of Energy in Relation to Bernoulli's Equation
- Bernoulli's Equation for Static Fluids

- Bernoulli's Principle – Bernoulli's Equation at Constant Depth
- Application of Bernoulli's Principle
- Velocity Measurement

**CHAPTER SUMMARY, 300**

- Problems and Exercises

**CHAPTER 13****Temperature and Heat, 304****Lesson 1****Zeroth Law of Thermodynamics and Temperature Measurement, 305**

- Temperature
- Human Perception vs. Reality
- Temperature Scales
- Temperature Ranges in the Universe
- Absolute Zero
- Thermal Equilibrium and the Zeroth Law of Thermodynamic

**Lesson 2****Thermal Expansion, 310**

- Linear Thermal Expansion – Thermal Expansion in One Dimension
- Thermal Expansion in Two and Three Dimensions
- Thermal Expansion in Two Dimensions

**Lesson 3****Heat and Heat Capacity, 314**

- Mechanical Equivalent of Heat
- Temperature Change and Heat Capacity

**Brumandinho Dam**  
p. 280

**Thermal Imaging Camera**  
p. 307

**Thermal Expansion**  
p. 310

- Heat Transfer and Temperature Change

#### Lesson 4

#### **Calorimetry, 318**

#### Lesson 5

#### **Mechanism of Heat Transfer, 320**

- Convection
- Radiation
- Energy Conservation Consultation

#### **CHAPTER SUMMARY, 331**

- Problems and Exercises

#### **CHAPTER 14**

#### **Ideal Gases and Laws of Thermodynamics, 334**

#### Lesson 1

#### **Properties of an Ideal Gas and the Ideal Gas Equations, 335**

- Ideal Gas Law
- The Ideal Gas Law Restated Using Moles

#### Lesson 2

#### **First Law of Thermodynamics, 338**

- Heat  $Q$  and Work  $W$
- Internal Energy  $U$

#### Lesson 3

#### **First Law of Thermodynamic and Thermodynamic Processes, 341**

- PV Diagrams and their Relationship to Work Done on or by Gas

#### Lesson 4

#### **Describing Reversible and Irreversible Processes, 349**

#### Lesson 5

#### **Second Law of Thermodynamics, 351**

- Heat Engines

#### Lesson 6

#### **Carnot Cycle, Processes Involved, and Pressure-Volume Diagram, 355**

- Carnot Engine

#### Lesson 7

#### **Entropy and Entropy Changes for Various Processes, 359**

- Entropy and the Unavailability of Energy to Do Work
- Heat Death of the Universe  
An Overdose of Entropy

#### Lesson 8

#### **Problem-Solving: Second Law of Thermodynamics, 365**

#### **CHAPTER SUMMARY, 371**

- Problems and Exercises

#### **GLOSSARY, 375**

#### **INDEX, 381**

#### **PHOTO CREDITS, 384**
