Table of Contents

Recessive Traits
p. 11

Unit One Genetics 2

Chapter 1 Patterns of Inheritance 3

Lesson 1

Concepts of Mendelian Genetics 4

Mendel's Model System 4

Phenotypes and Genotypes 6

Dominant and Recessive Alleles 7

The Punnett Square Approach for a
Monohybrid Cross 8

Scientific Method Connection 13

Lesson 2

Modifications to Mendel's Classic Ratios 15

Incomplete Dominance 15

Codominance 15

Multiple Alleles 16

Lethality 18

Lesson 3

Sex Linkage 20

X-Linked Traits 20

Human Sex-linked Disorders 22

Lesson 4

Genetic Linkage and Epistasis 23

Linked Genes Violate the Law of
Independent Assortment 23

Epistasis 25

Unit Two Central Dogma of Molecular Biology 32

Chapter 2.1

Basic Structures: DNA, RNA, and Protein 33

Lesson 1

Nucleic acids 34

Deoxyribonucleic Acid (DNA) 34

Ribonucleic Acid (RNA) 35

Lesson 2

Proteins 38

Chapter 2.2

DNA Replication 40

Lesson 1

DNA Replication in Prokaryotes 42

Lesson 2

DNA Replication in Eukaryotes 45

Telomere replication 46

Telomerase and Aging 47

Chapter 2.3

Transcription 48

Lesson 1

Prokaryotic Transcription 49

Prokaryotic RNA Polymerase 50

Elongation and Termination in
Prokaryotes 51

Lesson 2

Eukaryotic Transcription 53

The Three Eukaryotic RNA Polymerases 53

Structure of an RNA Polymerase II

Promoter 54

Transcription Factors for RNA

Polymerase II 56

Eukaryotic Elongation and Termination 56

Lesson 3

RNA Processing in Eukaryotes 58

mRNA Processing 58

Pre-mRNA Splicing 59

Processing of tRNAs and rRNAs 60

Chapter 2.4

Translation 61

Lesson 1

The Genetic Code Is Degenerate and Universal 62

Lesson 2

The Protein Synthesis Machinery 64

Ribosomes 64

tRNAs 65

Aminoacyl tRNA Synthetases 65

Lesson 3

The Mechanism of Protein Synthesis 66

Initiation of Translation 66

Translation, Elongation, and Termination 67

Protein Folding, Modification, and Targeting 68

Unit Three

Evolution and Origin of Biodiversity 74

Chapter 3

History of Life on Earth 75

Lesson 1

The Geological Time Scale 76

Mass Extinction 82

Chapter 4

Mechanism of Evolution 84

Lesson 1

Basic Mechanisms of Evolution 85

Natural Selection 85

Mutation 88

Genetic Drift 88

Lesson 2

Modern Synthesis and the Application of Evolutionary Forces to Population Genetics 91

Chapter 5

Evidence of Evolution 95

Lesson 1

Sources of Evidence of Evolution 96

Fossils 96

Anatomy and Embryology 97

Biogeography 99

Molecular Biology and Patterns of Descent with Modification 100

Chapter 6

Speciation 102

Lesson 1

Allopatric Speciation 103

Lesson 2

Sympatric Speciation 106

Unit Four

Systematics 116

Chapter 7

The Phylogenetic Tree and Basic Taxonomic Concepts 115

Lesson 1

The Phylogenetic Tree 116

Lesson 2

Building Phylogenetic Trees 118

Lesson 3

The Levels of Classification 122

Chapter 8

Perspectives on the Phylogenetic Tree 124

Lesson 1

Limitations to the Classic Model 125

Horizontal Gene Transfer 125

HGT in Prokaryotes 126

HGT in Eukaryotes 127

Genome Fusion and the Evolution of Eukaryotes 128

Lesson 2

Other Phylogenetic Models 130

Edmontonia
p. 80

Differential Stain
Technique
p. 145

Unit Five Prokaryotes and their Diversity 134

Chapter 9 The Structure of Prokaryotes 135

Lesson 1 Prokaryotic Diversity 136

Lesson 2 The Structure of Prokaryotes 140 The Prokaryotic Cell 141

Chapter 10 Prokaryotes, Diseases, and the Environment 148

Lesson 1 Reproduction of Prokaryotes and Its Pathogenicity 149

Lesson 2 Beneficial Prokaryotes 151 Prokaryotes and the Carbon Cycle 152 Prokaryotes and the Nitrogen Cycle 153 The Antibiotic Crisis 155

Unit Six Eukaryotic Origins, Protists, and Fungi 162

Chapter 11 Eukaryotic Origins 163

Lesson 1 Endosymbiosis 164 Mitochondria 165 Chloroplast 166

Chapter 12 Protists 168

Lesson 1 Characteristics of Protists 169 Protist Structure 169 Reproduction of Protists 171

Lesson 2 Protist Diversity 172 Supergroup Excavata 173 Supergroup Chlomalveolata 174 Supergroup Rhizaria 179 Supergroup Archaeplastida 180 Supergroup Amoebozoa 182 Supergroup Opisthokonta 185

Lesson 3 Ecology of Protists 186

Chapter 13 Fungi 190

Lesson 1 Characteristics of Fungi 191 Cell Structure and Function 191 Growth and Reproduction 192 Chytridiomycota: The Chytrids 194 Zygomycota: The Conjugated Fungi 194 Ascomycota: The Sac Fungi 196 Basidiomycota: The Club Fungi 198 Deuteromycota: The Imperfect Fungi 199

Lesson 2 Pathogenic and Beneficial Fungi 201 Animal and Human Parasites and Pathogens 202 Fungi and the Ecosystem 203 Fungi and the Food and Beverage Industry 206 Fungi and the Pharmaceutical Industry 207

Unit Seven Diversity of Plants 214

Chapter 14.1 The Plant Kingdom 215

Lesson 1 Early Plant Life 216 Green Algae and the Evolutionary Pathway to Photosynthesis 216 Plant Adaptations to Life on Land 216 The Major Divisions of Land Plants 218

Chapter 14.2 Seedless Plants 220

Giardia lamblia
p. 173

Red Tides
p. 187

Lesson 1

Bryophytes 221

Lesson 2

Seedless Vascular Plants 223

Evolutionary Adaptation of Vascular Plants 223

The Importance of Seedless Vascular Plants 226

Chapter 14.3

Seed Plants 228

Lesson 1

Evolution of Seed Plants 229

Lesson 2

Gymnosperms 230

Life Cycle of a Conifer 231

Lesson 3

Angiosperms 235

The Life Cycle of an Angiosperm 237

Diversity of Angiosperms 239

Lesson 4

The Role of Seed Plants 242

Animals and Plants: Herbivory 242

Animals and Plants: Pollination 243

Unit Eight

Diversity of Animals 254

Chapter 15.1

The Animal Kingdom 255

Lesson 1

Major Features of Animals 256

Lesson 2

How Animals Are Classified 259

Based on Body Symmetry 259

Based on Embryonic Development 261

Chapter 15.2

The Invertebrates 264

Lesson 1

Phylum Porifera 265

Lesson 2

Phylum Cnidaria 268

Lesson 3

Nematoda 273

Lesson 4

Phylum Annelida 275

Lesson 5

Phylum Platyhelminthes 277

Lesson 6

Phylum Mollusca 280

Lesson 7

Phylum Arthropoda 284

Lesson 8

Phylum Echinodermata 290

Chapter 15.3

The Vertebrates 292

Lesson 1

Characteristics of Chordates 293

Lesson 2

Fishes 294

Lesson 3

Amphibians 298

Urodela: Salamanders 298

Anura: Frogs 298

Apoda: Caecilians 299

Lesson 4

Reptiles 300

Crocodylia 300

Sphenodontia 301

Squamata 301

Lesson 5

Birds 303

Lesson 6

Mammals 305

Chapter 15.4

Evolution of Humans 308

Lesson 1

Evolution of Primates 309

Chlorophyll
p. 216

Plant Defenses
p. 242

Hagfish Slime
p. 294

Tuatara
p. 301

Tasmanian Devil
p. 307

Lesson 2

Human Evolution 311

Very Early Hominins 312

Early Hominins: Genus *Australopithecus* 312

A Dead End: Genus *Paranthropus* 313

Early Hominins: Genus *Homo* 314

Humans: *Homo sapiens* 314

Unit Nine

Organismal Biology 322

Chapter 16.1

Structure and Function of Animals 323

Lesson 1

Reproduction 324

Lesson 2

Nutrition and Energy Production 327

Ingestion 328

Digestion and Absorption 328

Lesson 3

Control Systems 333

Central Nervous System 336

Peripheral Nervous System 337

Autonomic Nervous System 337

Sympathetic Nervous System 338

Parasympathetic Nervous System 339

Lesson 4

Circulation 344

Lesson 5

Body Support and Movement 351

Lesson 6

Immunity 356

Innate Immune Response 356

Adaptive Immune Response 357

Chapter 16.2

Structure and Function of Plants 360

Lesson 1

The Plant Body 361

Plant Tissues 361

Organ Systems 362

Lesson 2

Reproduction 366

Lesson 3

Function of Plants 370

Chapter 16.3

Homeostasis and Feedback Mechanism 373

Lesson 1

Feedback Mechanism 374

Homeostasis 374

Thermoregulation 376

Osmotic Balance 376

Glossary 383

Index 389
