# TABLE OF CONTENTS

<b>MODULE 1: What are the structures and functions of cells?</b>	<b>1</b>
<b>LESSON 1: What are the postulates of the Cell Theory?</b>	<b>7</b>
History of the Cell Theory	7
<b>LESSON 2: What are the major differences between prokaryotic and eukaryotic cells?</b>	<b>21</b>
Eukaryotic vs. Prokaryotic Cells	22
<b>LESSON 3: What are the functions of the cell organelles?</b>	<b>31</b>
Structures closely associated with (but are not) organelles	32
Membrane-bound organelles found in eukaryotes	35
<b>LESSON 4: How are plant tissues classified? What are their functions?</b>	<b>41</b>
Classification of Plant Tissues	41
Types of meristems	42
The Three Tissue Systems	43
Secondary Growth	49
<b>LESSON 5: How do various animal tissues differ from each other? What are their functions?</b>	<b>55</b>
Animal Tissues	55
<b>LESSON 6: What are some cell modifications? How do they help the organism adapt to the environment?</b>	<b>69</b>
Cell Modifications	69
Apical Cell Modifications	70

Lateral and Basal Cell Modifications	72
Pseudopod	73
<b>MODULE 2: How do cells divide and transport materials?</b>	<b>77</b>
<b>LESSON 7: How do cells reproduce? What are the control points during cell division?</b>	<b>83</b>
Cell Cycle	83
Control Points During Cell Division	85
<b>LESSON 8: What are the stages of mitosis?</b>	<b>91</b>
The Chromosome	93
Mitosis	96
<b>LESSON 9: What is meiosis? How does it generate variation in organisms?</b>	<b>101</b>
Cell Division: Mitosis vs. Meiosis	102
Genetic Variation	106
<b>LESSON 10: What are some disorders or diseases that result from malfunctions during the cell cycle?</b>	<b>111</b>
Cancer	111
Chromosomal Abnormalities	113
Other Diseases or Disorders	116
<b>LESSON 11: What are the structural components of the cell membrane? How do they function?</b>	<b>123</b>
Functions of the Cell Membrane	124
The Fluid Mosaic Model	124
Phospholipid Bilayer	125
Membrane Lipids	126
Membrane Proteins	126

<b>LESSON 12: How do cells transport materials across membranes?</b>	<b>131</b>
Cell Transport	131
Passive Transport	131
Active Transport	135
<b>MODULE 3: What are the major building block biomolecules?</b>	<b>143</b>
<b>LESSON 13: What are the structures and functions of carbohydrates and lipids?</b>	<b>149</b>
Biomolecules	150
Carbohydrates	150
Lipids	153
<b>LESSON 14: What are the structures and functions of proteins?</b>	<b>161</b>
Proteins	161
<b>LESSON 15: How do nucleic acids differ from other biomolecules? What are the features of DNA and RNA?</b>	<b>171</b>
Nucleic Acids	172
<b>MODULE 4: How do cells transform energy?</b>	<b>181</b>
<b>LESSON 16: What is the ATP-ADP Cycle?</b>	<b>187</b>
The three main kinds of work in a cell	188
The ATP-ADP Cycle	189
The world of enzymes	190
<b>LESSON 17: What are the major features of photosynthesis?</b>	<b>199</b>
The concept of redox	199

<b>LESSON 18: How are starch and sucrose produced in plants, and what are their functions?</b>	<b>211</b>
The intermediates of sucrose and starch synthesis	213
The structure of starch	216
<b>LESSON 19: How do cells respire? What is the significance of cell respiration?</b>	<b>221</b>
Cellular respiration at a glance	222
<b>LESSON 20: What are the major events in glycolysis, Krebs cycle, and oxidative phosphorylation?</b>	<b>229</b>
Pyruvate Oxidation	232
The Citric Acid Cycle	232
Oxidative Phosphorylation	234
Anaerobic Respiration	236
Anaerobic Respiration vs. Aerobic Respiration	236
<b>Key Terms</b>	<b>241</b>
<b>References</b>	<b>254</b>
