# TABLE OF CONTENTS

<b>MODULE 1: How can we use functions to better describe the world around us?</b>	<b>1</b>
<b>LESSON 1: What are relations and functions?</b>	<b>5</b>
Relations and Functions: A Review	7
Domain, Codomain, and Range Analogy	11
Evaluating Relations and Functions	11
Relation Correspondence	12
Graphs and the Vertical Line Test	13
<b>LESSON 2: How can piecewise functions be utilized to describe social phenomena?</b>	<b>21</b>
Piecewise Functions	22
Definition of a Piecewise Function	23
Graphing a Piecewise Function	24
Common Piecewise Functions	26
<b>LESSON 3: How do you evaluate functions?</b>	<b>41</b>
Substitution of Constants	42
Formalizing the Definition of the Domain	44
Domains of Most Common Functions	45
Substitution of Algebraic Expressions into Functions	48
<b>LESSON 4: How do you operate on functions?</b>	<b>55</b>
Laws of Exponents	57
Addition and Subtraction of Functions	57
Addition and Subtraction of Polynomials	58
Multiplication and Division of Functions	59
Special Products	61
The FOIL Method	61
Addition and Subtraction of Rational Functions	63
Composition of Functions	65

## **MODULE 2: How can we determine algebraic relationships of complex phenomena?**

**71**

### **LESSON 5: What are rational functions?**

**75**

Definition and Domain of Rational Functions

76

Graphing Rational Functions

79

Intercepts and Asymptotes

79

Graphing and Analyzing Rational Functions

85

Rational Equations and Rational Inequalities

87

### **LESSON 6: What are one-to-one functions and inverse functions?**

**95**

One-to-one Functions

96

One-to-one Function as an Equation

98

Inverse Functions

99

Finding the inverse function of  $y=f(x)$

100

Inverse Function Property

102

Graph of One-to-one Functions and Inverse Functions

102

Graphing the Inverse Function  $y=f^{-1}(x)$

103

### **LESSON 7: What are exponential functions?**

**111**

Properties of Exponential Functions

113

Exponential Equations and Exponential Inequalities

115

Exponential Functions of base  $e$

117

Graphing Exponential Functions

118

### **LESSON 8: How are exponential functions used in real-life situations?**

**125**

Population Modelling

126

Exponential Growth

126

Exponential Decay

128

Half-life

129

Continuous Exponential Model

131

<b>LESSON 9: What are logarithmic expressions?</b>	<b>139</b>
Properties of Logarithms	140
Laws of Logarithms	140
Solving Exponents using Logarithms	146
<b>LESSON 10: How do you solve logarithmic functions?</b>	<b>151</b>
The Logarithmic Function	152
Graph of a Logarithmic Function	152
Natural Logarithmic Function	154
Solving Logarithmic Equations	154
Solving Logarithmic Inequalities	156
<b>MODULE 3: How can Mathematics be used in business and in financial instruments?</b>	<b>163</b>
<b>LESSON 11: What are simple and compound interests?</b>	<b>167</b>
Simple Interest Formula	168
Compound Interest Formula	170
<b>LESSON 12: What is ordinary annuity?</b>	<b>177</b>
Future Value of an Ordinary Annuity	178
Present Value of an Ordinary Annuity	180
<b>LESSON 13: What are other types of annuities?</b>	<b>187</b>
Types of Annuities	188
Annuity Due	190
Deferred Annuity	192
General Annuity	194

<b>LESSON 14: What are stocks and bonds?</b>	<b>203</b>
Market Indices for Stocks	206
Stock Tables	207
Market Indices for Bonds	208
Theory of Efficient Markets	210
<b>LESSON 15: What are loans?</b>	<b>215</b>
Types of Loans	216
Loan Computations	217
Amortization Payment Components	218
<b>MODULE 4: What role does Mathematics                     play in logic?</b>	<b>225</b>
<b>LESSON 16: What new propositions are formed                     using logical connectives?</b>	<b>229</b>
Simple Vs. Compound Propositions	230
Truth Tables	233
<b>LESSON 17: What are the special forms of propositions?</b>	<b>245</b>
<b>LESSON 18: When can you say that two propositions                     are logically equivalent?</b>	<b>255</b>
Conditional Proposition	255
Forms of Conditional Propositions	256
Table of Logical Equivalences	260

<b>LESSON 19: When can you say that an argument is valid and sound?</b>	<b>265</b>
Rules of Inference	267
Logical Fallacies	269
Logical Deduction	270
Categorical Syllogism	272
Validity of Syllogisms using Venn Diagram	272
<b>Lesson 20: How can you prove if an argument is valid?</b>	<b>277</b>
Methods of Proof	277
Methods of Disproof	282
<b>KEY TERMS</b>	<b>287</b>
<b>REFERENCE</b>	<b>291</b>
