

EARTH *and* LIFE SCIENCE

IMPORTANT REMINDERS

THESE MATERIALS WILL STRICTLY BE FOR REFERENCE/INSTRUCTION PURPOSES ONLY. THE CONTENTS OF THESE MATERIALS SHOULD NOT IN ANY MANNER BE SHARED OR DISTRIBUTED AS RIGHTS TO ITS ACCESS IS SOLELY GIVEN TO THE REQUESTING CLIENT. PLEASE USE PROPER CITATION/ATTRIBUTION WHEN USING THESE MATERIALS.

Authors

**Jeraline Gumalal
Paul Christian Yang-ed**

Series Editor

Jaime Caro, Ph.D.

TABLE OF CONTENTS

MODULE 1: How Did the Earth Come Into Being? What Does Earth Have That Makes It Your Home?

LESSON 1: What is the Origin of the Universe and the Solar System?

The Development of a Comprehensive Theory on the Formation of the Universe

Development of the Solar Nebular Theory

Recent Major Developments in Space Exploration and Research

LESSON 2: What Makes the Earth Habitable?

Basic Requirements of Life

Characteristics That Make the Earth Habitable

The Earth is a System of Interconnected Subsystems

LESSON 3: What are Minerals? What are Rocks?

What are Rocks and the Different Rock-Forming Minerals?

Properties of Minerals

The Processes and Drivers of the Rock Cycle

Rock Types

LESSON 4: What are Earth's Resources?

Natural Resources

What is 'Sustainable' Resource Use?

MODULE 2: What are the Processes That Take Place and Took Place on Earth? **71**

LESSON 5: What is Weathering? What is Erosion? **75**

Weathering	75
Erosion	76
Where Do All Eroded Materials Go?	77
Mass Wasting	78

LESSON 6: How Does Earth's Internal Heat Drive Volcanism, Plutonism, and Rock Deformation? **83**

Where Does Earth's Internal Heat Come From?	83
Volcanoes	84
Plutons	86
Deformation of Earth's Lithosphere	87

LESSON 7: What is Plate Tectonics? **93**

The Lithospheric Plates	93
Evidence for Plate Tectonics	94
Types of Plate Boundaries	99

LESSON 8: What Happened to the Earth in the Past? **105**

The Rock Record and Uniformitarianism	106
Quantifying Earth's History	107
The Geologic Time Scale	112

LESSON 9: What are the Geological Hazards in Your Community? **123**

Seismic Hazards	124
Volcanic Hazards	129
Mass Wasting Hazards	132
Hazards Related to Ground Subsidence	136

LESSON 10:	What are the Hydrometeorological Hazards in Your Community? What Makes a Disaster a 'Disaster'?	141
	Typhoons	142
	Tornadoes	149
	Monsoons	150
	Floods	151
	How Human-Induced Global Warming is Aggravating Hydrometeorological Hazards	156
	Introduction to Disaster Risk Mitigation and Adaptation	157
MODULE 3:	What are the Fundamental Principles of Life Science?	165
LESSON 11:	Where Did Life Come From?	169
	Theories on How Life Started	170
	The history of Life on Earth	170
LESSON 12:	What Makes Us Alive?	179
	Cells are the Foundation of Life	180
	Characteristics of Living Things	181
LESSON 13:	What is the Central Dogma of Molecular Biology?	193
	The Central Dogma of Molecular Biology	194
	DNA Synthesis and Replication	195
	The Journey from Transcription to Translation	196
LESSON 14:	What is Photosynthesis?	203
	Glucose and ATP	204
	Photosynthesis	205
LESSON 15:	How Do We Use Glucose to Get Energy?	213
	Cellular Respiration	214
	Stages of Cellular Respiration	215

MODULE 4: What are the Key Processes Involved in an Organism's Survival?

225

LESSON 16: How Do Plants and Animals Reproduce?

229

Sexual and Asexual Reproduction

230

Reproduction in Plants

233

Reproduction in Animals

236

Using Technology in Reproduction

237

LESSON 17: How Do You Sustain Life?

243

Digestion

244

Gas Exchange

245

Circulation

246

Excretion

248

Signaling

249

Nervous Control

250

Movement

251

Immune Defense

254

LESSON 18: How Do Plants Sustain Life?

261

Plant Cells and Tissues

262

The Three Tissue Systems

262

Transport in Plants

264

Plant Growth and Development

265

LESSON 19: How are Ecosystems Interdependent?

271

What is Ecology

271

Biomes

275

Ecological Cycles

280

Ecological Issues

282

287

Development of the Theory of Evolution	288
Lamarckian Evolution vs. Darwinian Evolution	289
Understanding Darwinian Evolution	290
Evidence for Evolution	292

299

319
